Inset map shows abundance of unauthorized ("promiscuous") dumps in a typical developing suburban area.

Base from U.S. Geological Survey 1:250,000 Series:
Yakima, 1964, Wash;
Monrovia, 1957, Wash;
Concrete, 1962, USA, Canada;
Hoquiam, 1952, Wash;
Seattle, 1951, Wash;
Victoria, 1957, USA, Canada.

INDEX MAP OF WASHINGTON

MAP EXPLANATION

	Active	Inactive
General Waste	▲	△
Denatation Waste	■	□
Woodwaste	●	○
Industrial Waste	◆	◇
Sludge	♦	◊

A wide variety of wastes, including food wastes, paper and wood products, metals, dirt, glass, plastic, junked vehicles, and animal and plant remains.

Mainly construction materials from razed buildings and other structures, including lumber, plumbing, masonry and concrete. Mostly combinations of materials, but may contain only one kind, such as plasterboard.

Includes trees, stumps, bark, boards, shavings, chips, and sawdust.

Mainly chemicals or waste by-products at manufacturing operations.

Chiefly from septic-tank disposal systems.

PA--"P" next to "inactive" symbol indicates proposed site.
▲36--Number next to "active" symbol corresponds to listing in Table 1.

SOLID-WASTE DISPOSAL SITES IN RELATION TO WATER RESOURCES IN THE SEATTLE-TACOMA URBAN COMPLEX AND VICINITY, WASHINGTON
